Final items

- Please provide the registration desk with your signed copyright form if you didn't submit it yet.

- Please email an **updated final version** of your notebook paper with correct citations and acknowledgements by 1. March 2017 to gawad@nist.gov Only these will go on the NIST public website as they arrive.

- Please update citations to give credit for resources used (see trecvid.nist.gov)

- Please send any suggestions for new external software development resources to be added to the tools & resources link

Final items

- Please send a pdf copy of your workshop slides presentation and/or poster to gawad@nist.gov

- Please send additional entries for the bibliography of peer-reviewed work using the TRECVID platform to gawad@nist.gov

- The call for participation will go out around Jan. 2017 with applications due end of Feb.

- The bus will leave at 2:00 for the courtyard Marriott at Rio, Gaithersburg.

- For those who need transportation before or after 2:00 please let the registration desk know.

Straw Proposal for MED '16

- Support the Ad-Hoc and Pre-specified event tasks
  - Ad-Hoc – create 10 new events – perhaps solicit ideas from the community
  - Pre-Specified – continue to use the current set of 20
- Support the Interactive Ad-Hoc task IFF 2 people say they are interested
- Metrics
  - Inferred Mean Average Precision
- Data:
  - If PROGRESS can be released:
    - Use 100,000 videos from Novel1 as the search collection, define a new 32,000 clip subset
  - Otherwise
    - Keep the same evaluation set definitions

LNK 2016 tentative plan

- Continuation of the task next year in more or less same set-up
  - Same data (possibly more)
  - Additional subtask in which the anchor is accompanied by user generated descriptions such as expected target description
  - Additional precision oriented measure
- TV15 result analysis to study diversity/ambiguity
- Suggestions for alternative approaches are welcome
- Stay tuned: videohyperlinking.com

Tentative plans for TRECVID 2017

- **TRECVID workshop** – Traditional date at NIST would be in the week of 13-17 Nov.

- **AVS** will continue (IACC.3 , new 30 Ad-hoc topics, auto & manually-assisted runs)

- **LOC** will discontinue (due to low participation and less interest)

- **INS** will continue (BBC EastEnders data and 30 new topics of the form of "find person X in location Y"

- **VTT** will continue (new set of Vine videos)

- **LNK** will continue (Blib.tv data)

- **MED** will continue

- **SED** will continue (new dataset option may be explored)

- TRECVID welcomes suggestions for new tasks (due Sep, 2017 to start in TV2018)
- Any feedback, suggestions, questions, or comments ? General or task specific.

New task proposals should ...

1. state the goals of the real world task being modeled
    - What real world task is being modelled; what real world problem(s) will be addressed; who, besides researchers, cares about this problem?
    - What is expected to be learned?
    - What valuable infrastructure would be created if the task were run?.

2. describe the system task in terms of inputs and outputs

3. define the evaluation procedure and measure(s)
    - Where would assessing/annotation occur (NIST? elsewhere?).
    - Are there are any special qualifications or domain expertise required of the assessors/annotators?
    - How much effort would such annotation/assessing require?

4. identify development and evaluation data
    - type
    - quantity
    - availability

THANK YOU

See you again in TRECVID 2017 ☺
